IES AM125-SC3 Anti-Theft Immobilizer System

INTRODUCTION:

IES AM125-SC3 is an anti-theft immobilizer system with transponder tag and is compatible with 12V vehicle. To deactivate the immobilizer system a valid transponder tag must be placed within the inductance coil range for code verification. If no code or invalid code detected during ignition ON the vehicle engine starter will disable.

PRODUCT FEATURES:

- **Arming Mode:**
  Turn the vehicle ignition key to OFF position, the immobilizer system will enter arming mode automatically after 30 seconds. The immobilizer system LED lights will flash slowly in arming mode.

- **Disarming Mode:**
  To disarm the immobilizer system, turn the vehicle ignition key to ON position and placed a valid transponder tag near the inductance coil within 15 seconds. If the immobilizer system detects the valid transponder tag the LED lights will be OFF, the immobilizer system is disarmed and the vehicle can be started.

- **Override with 4 PIN code:**
  In case of lost or malfunction of transponder tag, the user need to manually override the immobilizer system with the 4 PIN code given.

- Two way engine immobilization.

- Immobilizer wire harness of similar appearance to prevent easy identification.

- The immobilizer system is without socket to prevent from easily dismantled.
